

K-love has served me very well in the local community that I live in. In fact, if I am not listening to K-love it means the radio is turned off or I have a CD in. If a LPFM broadcaster is allowed to displace K-love in my community, it would be difficult to find another station that would offer the wholesome quality of broadcast and the commercial free aspect that is so great about K-love. So many stations go have such indecent programming or just a negative message, that it would be a shame to have K-love gone since it is always positive and encouraging.
